

DURABLE CONSOLES IN A SUSTAINABLE ENVIRONMENT

Evans Consoles is committed to operating a responsible business that has a minimal impact on the health and safety of our people, visitors, customers and communities. We are dedicated to fulfilling the needs of our customers while taking responsibility for the way our products and manufacturing processes affect the environment.

ENVIRONMENTAL STEWARDSHIP

Evans strives to utilize environmentally safe, recycled, and recyclable materials whenever feasible. We do business with suppliers who incorporate environmentally sustainable processes as well. As an example, Wilsonart, our laminates supplier, is the only Greenguard certified laminate supplier. Due to these relationships, Evans supply chain is highly environmentally friendly.

SUSTAINABLE PROCESSES

As an industry leader, Evans Consoles works diligently to ensure we manufacture an environmentally friendly product that can have a positive impact on your organization's environmental rating. Our environmental processes currently include:

- ✓ **Recyclable materials** – our consoles contain as much recyclable material as possible.
- ✓ **Recycling** – all waste resulting from our manufacturing process, including paper, cardboard, metal, and wood debris, are recycled. All paper waste resulting from office use is recycled as well. As an example, in 2004 Evans recycled 56.57 metric tones of fiber material alone.
- ✓ **Water based adhesives** – PVA adhesives are used for our laminates and fabrics.
- ✓ **VOC-free finishes** – powder coat finishing does not emit any VOC's.
- ✓ **Environmentally friendly cleaners** – environmentally friendly, citrus-based, cleaning solutions are used throughout our facility.
- ✓ **Reusable packaging** – reusable and recyclable crates are used for packaging, where further protection is required we use reusable blanket wrapping as well.
- ✓ **Product life expectancy** – while some technical furniture might need replacement every 5-7 years, Evans products are guaranteed to last at least 20 years. This extraordinary product life has a positive impact on landfill reduction.

PRODUCT MANUFACTURING

Wood: All fiberboards are made from 100% recycled wood fiber with at least 60% post-industrial recycled content.

Steel: Cold-rolled steel used in our consoles is 100% recyclable. We recycle all scrap metal.

Aluminum: The extruded aluminum used in our consoles is 100% recyclable. We recycle all scrap metal.

Laminates: We use low-emitting laminates on all our consoles.

Adhesives: Evans uses water-based PVA adhesives that do not emit volatile organic chemicals (VOC's).

Fabric: All fabric on our consoles is made from 100% recycled polyester and in turn is 100% recyclable.

Paint Finishes: Evans uses powder coat finishing on all metal parts. This environmentally friendly finish does not emit any VOC's.

LED Technology: Our innovative task lights use modern LED technology that reduces energy consumption by as much as 90% and eliminates the need for bulb replacement.

Product Life Expectancy: Our durable and high quality consoles are guaranteed to last at least 20 years. Such a lifespan has a positive impact on our environment as well.
